Sailing yacht

A **sailing yacht** (US ship prefixes SY or S/Y), is a leisure craft that uses sails as its primary means of propulsion. A **yacht** may be a sail or power vessel used for pleasure, cruising, or racing.^{[1][2][3]} There is no standard definition, so the term applies here to sailing vessels that have a cabin with amenities that accommodate overnight use. To be termed a "yacht", as opposed to a "boat", such a vessel is likely to be at least 33 feet (10 m) in length and have been judged to have good aesthetic qualities.^[4] **Sailboats** that do not accommodate overnight use or are smaller than 30 feet (9.1 m) are not universally called yachts. Sailing yachts in excess of 130 feet (40 m) are generally considered to be **superyachts**.^[5]

Sailing **yachts** are actively used in sport and are among categories recognized by the governing body of sailing sports, [World Sailing](#).^[6]

Etymology

Sailing yachts are actively used in sport and are among categories recognized by the governing body of sailing sports, [World Sailing](#).^[6]

The term, *yacht*, originates from the [Dutch](#) word *yacht* (pl. *jachten*, which means "hunt"),

and originally referred to light, fast sailing vessels that the [Dutch Republic](#) navy used to pursue [pirates](#) and other transgressors around and into the shallow waters of the [Low Countries](#).^[7]

History

The history of pleasure boats begins with rowed craft in Pharaonic Egyptian times. The history of sailing yachts begins in Europe in the beginning of the 1600s with the building of a pleasure vessel for the son of [King James I of England](#). Pleasure vessels acquired the name *yacht* after the time of [Charles II](#), who spent time exiled in Europe and visited the Netherlands, where a variety of *jachten* were already well developed as pleasure boats for the elite classes since the beginning of the 17th century. Upon his restoration to the English crown, Charles commissioned a series of small yachts, which included at least one experimental <https://en.wikipedia.org/wiki/...> between two vessels occurred in 1661, followed by the first open sailing competition in 1663 in English waters.^[8]

Collabora Online

Why the Collabora Online Subscription?

Focused on providing high quality software, thoroughly tested and ready for business

Collabora Online is a powerful online office suite, which you can integrate into your own infrastructure. We take digital sovereignty seriously and provide you with all the tools to keep your data secure, without compromising on features. With our supported subscription you get:

- Assured Digital Sovereignty & Security**
 - On-premise / self hosted - control your data, app & network
 - No ties to any storage or authentication system
 - Documents are not broadcasted to all clients, but shared as pixels
 - Each document session gets its own private jail - with no local copy between document editing sessions
 - Simple integration based on a WOPI API providing storage & authentication
- No Limitations for Your Productivity**
 - All code is Open Source
 - Full featured, rapid improvement
 - Available for all major PC and mobile platforms
 - Flexible - many different integrations into 3rd party solutions
 - Excellent interoperability with DOCX, XLSX, PPTX and other Microsoft files
- A Cost Effective & Flexible Plan**
 - Simple pricing plan
 - High Availability as standard
- Product Management Relationship**

Distinctives

Friendly Open Source Project

Real Open Source

- 100% Open Source code
- Built with LibreOffice technology
- Built with Free Software technology stacks: primarily C++
- Runs best on Linux

Open Development

- Anyone can contribute & participate
- Follow commits and tickets
- Public community calls - forum has details

Focus

- A non-renewable resource
- Office Productivity & Documents
- Excited about migrating your documents
- Grateful to our partners for solving other problems

Friendly Open Source Project

Responsive Support

- Standing behind our customers
- ISO 9001, and ISO 27001 certified

Sensible licensing

- As many servers & connections
& containers & VMs as you need

“Office for the free world”

- Friendly Developers
 - 50% EU, 75% NATO, global org + LibreOffice technology community
- Friendly Investors
 - 50/50 ~Canada/UK
- Engineers that can travel to you
- Clean hands

Document Security

Highly Available & Simply Scalable

eg. grab our helm-chart

- Incremental / available upgrade-ability
- No extra services
- Management (eg. Kubernetes)

COOL Controller

Even easier deployment & scaling

Scaling Collabora Online with Kubernetes

- Improved scaling and load distribution
- Cost efficient server usage
- Perfect for large deployments

Scaling Collabora Online with Kubernetes

- Load scaling example – target pod utilisation <70%

Scaling Collabora Online with Kubernetes

- Load scaling example – pod under-utilisation

The Colleges of Cambridge

The [University of Cambridge](#)¹ is composed of 31 colleges in addition to the academic departments and administration of the central university. Until the mid-19th century, both Cambridge and Oxford comprised a group of colleges with a small central university rather than universities in the common sense. Cambridge's colleges are run by students, academics and staff – an environment in which generations are able to mix, with both students and fellows experiencing "the breadth of the University at an intimate level".

Search for Help

Search within the Online Help and Keyboard shortcuts dialogs to filter for topics and keywords

PDF Improvements

- Generating accessible PDFs with PDF/UA export
- Exporting to PDF v.1.7 by default
- Tagged PDFs produced by default
 - Include hidden accessibility markups to improve the reading experience with screen readers and other assistive technologies
- Hybrid PDFs now storing original ODF documents
 - For sharing documents with others as a pdf, while retaining the functionality of being able to modify the original file

Continued Accessibility Wins

- Screen reading & keyboard usability wins
- Processing lots of Audit results
 - Actively fixing and polishing large numbers of improvements
- Target full WCAG 2.0 AA conformance

Cell Protection and Section Editing

- Greater control of data in Calc and Writer

Improved Read-Only Mode

- Previously, read-only access was not interactive
- Now we offer more granular control for documents and spreadsheets
 - Allow users to select document text
 - Improved accessibility
- Plus you can now follow hyperlinks in read-only documents

Present in Window

- New option to present slides in a new window

Quarantine

- Rescue documents from corner-cases
- Imagine someone changing permissions on the document you are editing...
- Suspends the state-less-ness we know and love somewhat
 - Off by default

Auto-Save

- Auto-saving can now be carried out in the background
- Fewer interruptions to editing
- 700ms before the animation, 7ms to fork...

Fewer interruptions with 24.04

Interoperability

Smart Justify

- Maximised interoperability with Microsoft Word
- Image shows a composite of pages typeset by Writer (black) and Microsoft Word (red) before and after the update.
- The line breaks ultimately resulted in a two-page document for Writer, where Word rendered as one.

Integer sodales tincidunt tristique. Sed a metus posuere, adipiscing nunc et, viverra odio. Donec auctor molestie sem, sit amet tristique lectus hendrerit sed. HTML Copy/paste with Google Sheets

- Reverse-engineered and documented Google Sheets extensions
 - Preserves formulae vs values and styling
 - Ensuring that data copied from Calc includes markers such as `<google-sheets-html-origin/>` to fully work with Google Sheets
- Help Collabora Office Desktop ↔ Collabora Online copy/paste as well as from Google Sheets

Improved Graphics Support

- Previously SVGs would default to the fallback PNG
 - OOXML should now render the SVG image correctly
- Three interoperability issues related to Windows EMF and EMF+ files have also been resolved
- Smoother experience when working with SVGs, EMF and EMF+ files

STYLEREF

- Create dynamic headers or footers that automatically update based on changes in the document.

Draft Legal Document

STYLEREF Example

Below is a title, formatted with the 'Heading 1' style.

Writer can now insert a STYLEREF cross-reference field, so that the content is updated anywhere it is used, for examples headers and footers.

1.1 This title content is mirrored anywhere it occurs in the document, for example the heading

By mirroring the content of titles, you can make sure you always know what section of a document

Performance

2x Faster Document Loading

Carrying out processes in parallel to halve load times

Previously in series

Up to 2x faster in parallel

Up to ~18x Faster Tile Compression

- This speed-boost stacks two improvements
 - 4.5x performance from run length encoding
 - 4x performance improvement from improved threading
- Combined for ~18x speed boost for tiles

Improved Threading in Calc

- We tested time for loading, recalculation, and saving
- 650,000 test spreadsheets
- Time reduced from 3 days, to 36 hours
 - ~2x speedup

Long Running Demo Profiles: A Week

What does it mean?

- 17% of a week of profiling:
- Detecting: “is it a Hybrid PDF”?
- Unbelievably wasteful
- Scan last 4k block ‘AdditionalStreams’ +17%

Rendering Tiles 40% of Your Profile ?

Lots of unnecessary re-rendering

- Pruning the simple cases out

Silliness in various places

- Now much improved

The Magic of AVX2 – Branch Free RLE

prepend 'last' pixel of the last block

Block of next four pixels to RLE ...

Next time's 'last' pixel:

Build comparison register:

Compare: `cmpeq_epi32`

Magic: floating point sign mask: `movemask_ps`

This is our RLE mask.

NB. really 8 pixels at a time, not four and more 0's and f's needed ...

How many pixels to copy? `popcount(RLE mask)`
 Which ones ? RLE Mask → LUT + AVX2 gather
`permutear8x32_epi32 ...` is your friend

Performance – Faster & Simpler

A faster, slicker experience

- Memory trimming on idle: cleans caches & frees up memory
- Swap out compressed image data as well as uncompressed
- Faster load of large spreadsheets
- Significantly reduced re-rendering (even more pending)
- Continual style re-thumbnailling redux – caching of generated JSON
- Improved tile pre-loading (with more caching work queued)
- Clamp over-sizing of threads
- Accelerated transparent text rendering
- Avoid background whole document renders
- Compress RLE'd tiles on the wire
- Scan /proc/<pid>/smaps_rollup

Performance Tuning

- Much faster for many operations – for example – multiple users to join a shared Writer document and scroll through a long, heavy Writer document.

Joining Writer Shared Document

Writer document with 5 pages. 20 users joining simultaneously, until all clients rendered. perf stat -e cycles

Writer Scrolling

Writer document with 157 pages, 164 shapes, 32 comments, 13 images, 115 tables. Wheel scrolled from start to end. perf stat -e cycles

Performance Tuning

- Reduced time to load graphic heavy Impress slide decks, and comment heavy Calc spreadsheets.

Impress Full Screen Presentation Generation

60 graphics heavy slides. Wall clock time.

Calc XLSX Comments Load

1000 Rows, 30 Columns, 2500 Comments. Wall clock time.

Other Updates in the Last Year

Collabora Online

Accessibility Features

Dark Mode

Initial Screen Reading Support

Keyboard Navigation

Accessibility Checker

PDF/UA

Find out more: col.la/accessibility

Accessibility

Dark Mode

- Also added various UI properties per-view: eg. non-printing characters, spell-underlines etc.

Accessibility

Keyboard Accelerators

- Expansion for languages
 - Keyboard shortcuts have been expanded to allow all users to be able to use their own language's keyboard shortcuts when editing a file collaboratively.
 - Holding down the 'Alt' key will also highlight options for learnability.

Accessibility

Page Navigation

- Navigator functionality is viewable in the sidebar, allowing you to jump to each section by simply clicking the headings.

Interoperability

Document themes - controlling branding

- Document themes can be configured and applied to a whole document to easily change and re-purpose the appearance, giving it a consistent style and branding.

Interoperability

Interoperability

Multi-page floating tables

- Allows your tables to span content over multiple pages inside floating frames
- Significantly improves interoperability with tables that have been accidentally floated by users, and that span multiple pages.
- Preserving layouts across platforms
 - Lots of mis-designed Government forms – where tables are used for rendering borders are improved, and rendered better.

Collabora Online

Oh, that my words were recorded, that they were written on a scroll, that they were inscribed with an iron tool on lead, or engraved in rock for ever! I know that my Redeemer lives, and that in the end he will stand upon the earth. And though this body has been destroyed yet in my flesh I will see God, I myself will see him, with my own eyes - I and not another. How my heart yearns within me. - Job 19: 23-27

Thank you!
